1. Claims 1-11 are presented for examination.
2. The objection to the Abstract of the Disclosure has been withdrawn due to applicant's amendment filed on 10/13/2005.
3. The rejection of claim 1 under 35 U.S.C. § 112 has been withdrawn due to applicant's amendment filed on 10/13/2005.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

or

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-11 are rejected under 35 U.S.C. § 102(e) as being anticipated by Sayan et al. (Sayan) patent no. 6,477,569.

6. As to claim 1, Sayan teaches the invention as claimed, including a system for managing the use of resources in a system where a remote client uses resources at a server for a limited duration, the system comprising:

a stored log file listing of at least one resource being used at the server and the client using that resource (col. 5 lines 46-65; col. 7 lines 35-61);

a system which identifies whether the remote client is no longer using resources at the server, including determining a combination of whether the resources have been held by the remote client for a period longer than a first preset threshold and whether the resources have been held by the remote client without use of the resources for a period longer than a preset threshold (Sayan, col. 8 line 64 – col. 9 line 5, col. 12 line 35 – col. 14 line 20); and

in response to the system identifying that the client is no longer using resources at the server, a mechanism which removes the resources which had been used by the client when the remote client was connected to the server, whereby the resources being used by the client are capable of being used by other clients after the client has disconnected from the server (Sayan, col. 12 line 35 – col. 14 line 20) .

7. As to claim 2, Sayan teaches the system which identifies that a remote client is no longer using a resource at the server includes a mechanism for determining that the client is no longer connected to the server through a data transmission network (Sayan, col. 12 line 35 – col. 14 line 20).

8. As to claim 3, Sayan teaches the system which identifies that a remote client is no longer using a resource at the server includes a system for determining that the program which uses the resource has terminated (Sayan, col. 12 line 35 – col. 14 line 20).

9. As to claim 4, Sayan teaches the server maintains a listing of each of the clients using a resource associated with the server and the resources which are used by the respective client (col. 5 lines 46-65; col. 7 lines 35-61).

10. Claims 5-11 have similar limitations as claims 1-4; therefore, they are rejected under the same rationale.

11. In the remarks, applicant argued in substance that

(A) Prior art does not teach determining whether the resources have been held by the remote client for a period longer than a first preset threshold.

As to point (A), Sayan teaches determining whether CPU resource have been over-taken by a client for a period longer than CPU Limit parameter which is being set

to at least twice the maximum time used for the longest of all transactions serviceable by a pool agent (Sayan, col. 8 line 64 – col. 9 line 5).

12. Applicant's arguments filed on 10/13/05 have been fully considered but they are not deemed to be persuasive.

13. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
